GRG Lights up Jacksonville for Super Bowl XXXIX

ORLANDO, Fla., February 3, 2005 – GRG Inc. is helping to light up Jacksonville for this weekend's Super Bowl festivities.

GRG's Lighting Design Group provided the lighting design for the existing St. Augustine Overpass "Jacksonville" sign on I-95 to help welcome visitors as they arrive for the big game. The project consisted of three main lighting elements with one future element. The first of the three current design elements consisted of lighting two column groupings, one on each side of the highway at the ends of the bridge span. The second current design element consisted of lighting the embankment walls at each end of the bridge span. And the third and most important current design element consisted of lighting the letters that actually spell "Jacksonville" above the bridge span.

GRG's Lighting Design Group (LDG) focuses on combining the art of lighting design with the science of engineering in one seamless package. LDG offers front-of-house aesthetic lighting, back-of-house utility lighting, landscape lighting, theatrical infrastructure, system-wide dimming and control, customized dynamic lighting effects, and custom fixture design.

GRG Inc. is one of the strongest, most experienced MEP firms in the United States with a staff of 130 individuals, licensed in 30 states, with offices in Orlando, FL, Las Vegas and Reno, NV. GRG specializes in the hospitality, entertainment, advanced technology, healthcare, science, condominium, and casino market sectors.

Services include mechanical, electrical, plumbing, fire protection, special building systems, commissioning, owner representation, and lab planning.
